Front View  
±90° Rotation

Side View  
±90° Rotation

*The Only USB Adapter That Flexes  
Up/Down and Left/Right*

Gold Plated Contacts

Locking Notches Hold the USB Devices Steady

Compatible with USB 2.0 Devices

**1**

### **With FlexUSB, Ports Are Never Blocked!**

USB drives, card readers and other products can block nearby ports. Simply plug your USB device into a FlexUSB so it can rotate and lock into any position, freeing blocked ports. USB devices can be moved into a safe position beside the PC and no longer take up excess space.

**3**

### **FlexUSB Makes Connections Easy!**

USB ports are often in difficult to reach places on your desktop computer. With FlexUSB, you never waste time working with your USB ports again.

**2**

### **With FlexUSB, No Cables Are Required!**

Frequently, card readers and other USB accessories won't fit into your USB port so you are forced to carry a cable. With FlexUSB, your accessory can connect into any computer's USB port, regardless of how they are arranged and FlexUSB holds the device in place.
